

**Labtopia Staffing** is a full-service staffing firm providing flexible solutions to manage your scientific, technical and managerial staffing needs. We help our clients focus on the business and thus avoid the valuable time and money they might normally spend on placing ads, reviewing resumes, interviewing and training candidates. From temporary placement, contract professional placement, payroll support and direct hire capability, we tailor our solution to meet your unique needs.

We help build the right team with a number of strengths of our own:

#### **Strong Technical and Scientific Background**

Our executive team is comprised of former lab and quality directors with experience in managing QA/QC systems and directing bench activities in regulated environments. We work with organizations across a large number of technical and scientific industries. We know the challenges and opportunities that face your organization when it comes to hiring the right people, and we can help you find the quality of people we would want to see as hiring managers.

#### **Ability to Respond Quickly with High Quality Candidates**

We offer qualified candidates for new job opportunities within the time frames you need them. We have a large, pre-qualified candidate pool for high-demand positions—we have tested their skills, documented their credentials and work experience, interviewed them, and checked backgrounds and references. We are constantly adding to our resource pool so we can respond immediately to your temporary and contract staffing needs.

#### **National Network of Specialty and Senior Candidates**

Our consulting practice has helped us build a network of qualified, highly-skilled individuals across a number of professional and managerial positions. We can quickly solicit candidates on a local, regional, and national basis to find the right person for your needs. We understand the value of “fit” with these more senior and specialty positions, and use a variety of tools to ensure that the skills and temperament of a candidate is worth your time and consideration.

#### **Tools to Help You Find and Train the Right Team**

Our recruiting team is continually improving the ways we find, screen and make candidates available for your review. Forget the volumes of unscreened resumes—we filter and package candidate summaries to ensure you get the most valuable information with the least amount of time investment on your part. If you desire unique skills and expect consistent performance from day one, we can collaborate on customized training to build the knowledge foundation for your new hires. Have trouble retaining employees? Let us perform a comprehensive review of your compensation, benefits and training programs.
